

## Description

The Ankr-TITE Wedge Anchor is a high-strength, fully threaded, and torque-controlled expansion anchor designed for anchoring into normal-weight concrete, lightweight concrete, and grouted concrete masonry. The Ankr-TITE anchor has a unique **machine lathed expansion cone** that supports a thick **three dimple clip** engineered to provide high load carrying capability and reduce slip in a variety of installation conditions. "Bolt size is hole size" – the drill bit diameter needed for proper installation is the same as the anchor diameter.

## Key Features & Benefits

- ▶ **Machine lathed expansion cone** provides precise, rapid expansion
  - Similar products are just cold-formed
- ▶ **Enlarged 3 dimple clip**
  - Reduce slip
  - Increase response in light-weight concrete
- ▶ **Unique safety shoulder**
  - Supports clip when anchor is under strain - prevents clip from jumping onto threads during installation
  - Minimizes bolt-end collapse and/or clip slippage under ultimate loading conditions
- ▶ **Dog-point head** prevents point damage during installation
- ▶ Length identification code stamped on each anchor – easy visual inspection
- ▶ 360° segment contact on clip equalizes load distribution
  - Increases load-carrying capacity
  - More adaptable to "forgiving" in different installation conditions

(continues on page 2)

## Specifications, Listings and Approvals

**Diameters:** 1/4" - 1-1/4"

### Materials:

#### **AT Style (Zinc-Plated Carbon Steel):**

- **Body:** UNS G 10350, AISI 1035
- **Clip:** ASTM A108 Grade 1018
- **Washer:** Carbon Steel; NSI/ASME B18.22.1
- **Nut:** Carbon Steel; ANSI/ASME B18.2.2
- **Plating:** Zinc: ASTM B633 Type III

#### **ATG Style (Hot-Dip Galvanized):**

- **Body:** UNS G 10350, AISI 1035
- **Clip:** Type 304 Stainless Steel
- **Washer:** Carbon Steel; NSI/ASME B18.22.1
- **Nut:** Carbon Steel; ANSI/ASME B18.2.2
- **Plating:** SC1 Hot-dip galvanized: ASTM A153

(continues on page 2)

## Key Features & Benefits (continued from page 1)

- ▶ Available in four combinations:
  - Zinc-plated Grade 5 Steel
  - Hot-dip galvanized carbon steel with 304 stainless steel clip
  - 304 stainless steel
  - 316 stainless steel
- ▶ Sets up fast
- ▶ Fewer rotations to achieve required torque

## Applications

- |                              |                                      |
|------------------------------|--------------------------------------|
| ▶ Shelving                   | ▶ Machinery                          |
| ▶ Racking                    | ▶ Sill and Support Ledgers           |
| ▶ Railings                   | ▶ Lighting Standards and Base Plates |
| ▶ Structural Connections     |                                      |
| ▶ Safety-Related Attachments | ▶ Industrial Equipment               |

## Specifications, Listings and Approvals *(continued)*

### **ATS Style (Type 304 Stainless Steel):**

- **Body:** AISI 12L14 Type 304 Stainless Steel
- **Clip, Washer & Nut:** Type 304 Stainless Steel

### **ATSS Style (Type 316 Stainless Steel):**

- **Body:** AISI 12L14 Type 304 Stainless Steel
- **Clip, Washer & Nut:** Type 304 Stainless Steel

### **Federal Specifications:**

- QQZ-3252, Type II, Class 3
- GSA FFS-325 Group II, Type 4, Class 1 (Clear Chromate Added)
- GSA FFS-325 Group II, Type 4, Class

### **Code Compliance:**

- Miami/Dade NOA: No. 13-0701.05
- State DOT Approvals: Call Customer Service for specific information by state

## Installation Information

### Instructions

1. Drill the hole, whose diameter equals the anchor diameter, perpendicular to the work surface. To assure full holding power, do not ream the hole or allow the drill to wobble.

Drill the hole deeper than the intended embedment, but not closer than two diameters to the opposite surface of the concrete.

2. A clean hole is necessary for proper performance. Clean the hole using a nylon brush and compressed air.
3. Assemble the nut and washer onto the anchor. Drive the anchor through the material to be fastened at the calculated embedment depth.
4. Tighten the nut, or head, 3 to 5 turns past the hand tight position. Installing with a torque wrench is recommended for optimum performance. Refer to Recommended Setting Torque\* in the table below.

**NOTE: Always wear safety glasses.** Follow drill manufacturer's instructions. Use only solid carbide-tipped drill bits meeting ANSI B212.15 diameter standards.

## Installation Data

Anchor Dia. (in.)	Drill Bit Dia. (in.)	Fixture Clearance Hole (in.)	Thread Size (UNC)	Nut Height (in.)	Washer Diameter (in.)	Wrench Size (in.)	Recommended Setting Torque (ft-lbs)*
